

Char-Griller Flavor Pro

Background

My first project at Char-Griller was to modify and improve the appearance of an existing concept grill. The Flavor Pro had been designed and engineered, but looked too generic. The Flavor pro is a unique Gas Gill that has a dedicated slide out drawer which allows for Charcoal and wood to burn or smoke alongside the gas. I designed a new lid for the Flavor Pro, which led to a design refresh on future Grills, launching in 2021. The Flavor Pro officially launched in January 2020. For this project I used 2d Sketching and a combination of Solidworks + Keyshot
